PROFILE

Detail-oriented Web Developer specializing in Laravel and VueJS, with experience in building business-critical systems from scratch. Passionate about creating efficient, scalable web applications and continuously expanding technical expertise through hands-on projects.

WORK EXPERIENCE

IT Specialist

La Famiglia Lending Investors Corporation

January 2024-present

- Engineered a custom Chrome browser extension that automates client document generation within LoanDisk, reducing manual data entry time and eliminating common human errors.
- Designed and implemented a custom-built Network Attached Storage (NAS) solution using OpenMediaVault on a repurposed PC, centralizing company data. This project optimized file accessibility while eliminating the need for costly cloud storage subscriptions and improving local network performance.
- Independently developed and deployed a fully-custom Loan Management System using Laravel, replacing the company's LoanDisk subscription. The system automated manual workflows, eliminated human errors, and significantly reduced operational costs by addressing the company's exact needs.

Technologies used: Laravel, VueJS, MySQL, OpenMediaVault (NAS), JavaScript, Hostinger
